

MANAGING COVID-19 AT ALERT LEVEL 3

See how the HazardCo System can help you manage COVID-19 within a client's home or workplace.

WORKING IN A CLIENT'S HOME OR WORKPLACE

BEFORE YOU ARRIVE

- Ensure you have a Specific COVID-19 plan detailing the steps you are taking to mitigate risk and share with your client. You can do this by downloading the HazardCo COVID-19 specific TA for Alert Level 3.
- Induct your client online which includes COVID-19 information prior to you starting work.
- Re-induct your workers to include the COVID-19 protocols prior to you starting work. Record using the toolbox talk feature on the HazardCo App.

DURING WORKS

- Keep a record of where you have been, who you have been interacting with and their contact information. At the start of every job you need to complete a Risk Assessment, you will find your COVID-19 contact tracing questions under the first section 'work area'.
- Thoroughly wash hands upon entering the site.
- Keep a 2 metre physical distance with your client and workers at all times.
- Try to avoid using the client's kitchens and bathrooms where practical.
- Try to separate the work area from the rest of the home.

BEFORE YOU LEAVE

- Thoroughly wash hands upon leaving the site.
- Ensure your client understands they need to make you aware if they suspect they have contracted or come in contact with someone who has COVID-19.
